

# intemail C4 series

The C4 series from inTemail are a range of modular, intelligent mailing systems.

## Range Features

- a uniform C4 series base inserter
- a uniform track extension
- upgradeable with any modular inTemail feeder
- re-configurable feeders or combination of feeders
- simple roll-up, plug-in feeders / loaders
- real time operating software control
- superb reliability
- great functionality
- finest build quality
- low maintenance
- optional dual machine track extension
- optional InTemail cross fold unit

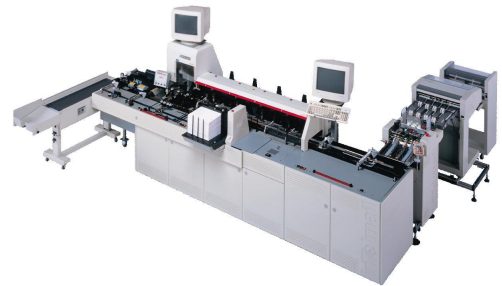

## Modular system configurations

The systems outlined below incorporate the same C4 series intelligent base inserter that may be integrated with a variety of inTemail intelligent, modular feeders. The various modules are simply rolled-up, plugged-in and the entire system, under control of the inTemail real time systems operating software is ready to go. Machines are available in configurations of between 2-16 stations.

### C4 A Folder Feeder

**A cut sheet or continuous forms processing system**

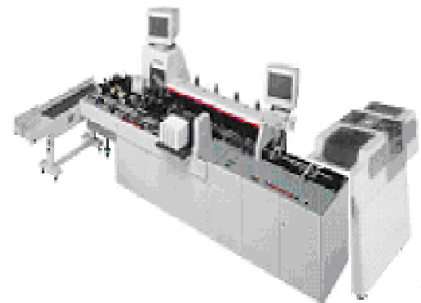

- **slitter/merger/burster**
- **Model A cut sheet feeder/accumulator/folder**

### C4 VAF Variable Accumulator Folder Feeder

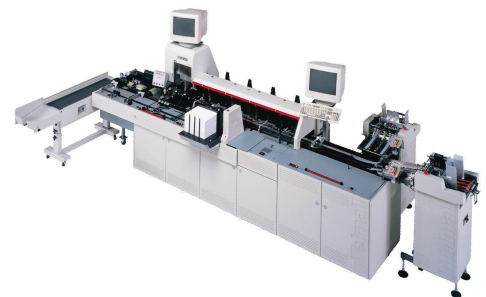

**A single channel, dual stream document processing system**

- **VAF sheet feeder/accumulator/merger/folder module**

### C4 4/2 A.A Dual Accumulator Folder Feeder with cross fold unit

- **A two separate streams processing system with cross-fold unit**
- **2 off A cut sheet feeder/accumulators**

Further modules and feeder configurations are available to accommodate a variety of applications.
