

inTemail VAF Feeder

The VAF (Variable Accumulator Folder) Feeder from inTemail is designed to process complex mailing applications.

VAF

Variable Accumulator Folder Feeder

The VAF Feeder is specifically designed as either a stand-alone unit or as a module within a full system configuration, linked on-line with other Feeders and Inserters, to process any complex mailing application.

The VAF Feeder is driven and controlled by the inTemail real-time operating system software and is capable of reading and feeding A4 cut sheet forms at the rate of 65,000+ per hour, processing via OMR/Barcode or by direct link to data base.

Typical applications

- Use on-line with inserter to feed & fold sets and envelope each set with selected inserts matched or unmatched.
- Use on-line with inserter and a 1-up or 2-up continuous forms attachment to convert continuous forms into cut sheet and process as above.
- Use off-line
- Fold speeds up to 14,000 per hour
- 1-8 sheets C or Z fold
- 1-12 sheets half fold or no fold
- Paper size A5 to A3
- OMR, OCR, BCR, 2D or batch count

The true connectivity and proven versatility of inTemail intelligent mailing system modules and software provides solutions for any mail-processing requirement.

inTemail's range of mailing equipment, whether used as stand-alone units or integrated into complete intelligent systems, can greatly expand your mail processing capabilities.

Technical Specifications

Feed & Read Rate	65,000+ A4 sheets p.h.
Form Sizes - min.	145 x 180 mm
Form Sizes - max.	300 x 420 mm
Paper Weights	60-200 gsm
Letter folded sets	up to 8 pages 85gsm
Half folded sets	up to 12 pages 85gsm
Power Requirements	220-250 volts, 50-60Hz single phase
Power Consumption-max.	0.84 Kw
Heat Emission-max.	500 J/s
Sound level (with covers)	85 dB
Dimensions	L-1480 x W-510 x H-1145mm
Weight	180 Kg

intemail VAF Feeder

Product Information

Standard Machine Features

- Mobile plug in feeder
- Feeds into back of inserter
- Interchangeable with other feeders
- Double sheet detector
- Easy adjustment for form size
- Non-contact belts for smear free accumulating
- Set accumulation before or Self adjusting folding
- Self adjusting folder roller pressure for varying thickness
- Half fold, letter fold, Z-fold, no fold

Standard Software Features

- Built in computer
- Real Time Operating Software
- OMR reading front or back controls
 - Sheet and set sequence checking
 - Variable multiple form set control
 - Controls for inserter selection, etc.
- Fixed multiple form set by counter
- Missing or duplicate form detection
- Interface to inserter computer

Optional Software Features

- Barcode Reading, front or back
 - Sheet and set sequence checking
 - Variable multiple form set control
 - Controls for inserter
 - Missing or duplicate form detection
 - Match forms between multiple on-line feeders
 - Identify and track individual sheets
- Network Ready
- Data output to on-line printer
- Monitoring and Reporting
- Interface to external database
- Interface to any type of forms printer
- Switchable add – on code reading software for most OMR-BCR-OCR requirements

Machine Options / Attachments

- Feed from front or end of inserter
- Continuous forms feed attachment
- Slitter to remove code marks
- Divert certain forms from the work flow
- High capacity Loader
- High capacity receiving hopper or conveyor for off-line use
- Four plate folder
- Under or over accumulation
